

MODULE 2- LINUX

Environment Variable

1. How can you know what is the secondary command prompt set your system?
How can you change the secondary command prompt from the default to your username?

```
user@user-VirtualBox:~$ echo $PS2
>
user@user-VirtualBox:~$ PS1="$LOGNAME"
user
```

2. How can you ensure that the mv command (used for renaming a file) always asks for permission before overwriting an existing destination file?
[Hint: use alias command]

```
user@user-VirtualBox:~$ touch source.txt
user@user-VirtualBox:~$ touch destination.txt
user@user-VirtualBox:~$ alias Cdmv="mv source.txt destination.txt"
user@user-VirtualBox:~$ Cdmv
mv: overwrite 'destination.txt'? y
user@user-VirtualBox:~$ cat destination.txt
user@user-VirtualBox:~$ echo "WELCOME">source.txt
user@user-VirtualBox:~$ Cdmv
mv: overwrite 'destination.txt'? y
user@user-VirtualBox:~$ cat destination.txt
WELCOME
user@user-VirtualBox:~$ █
```

Basics Of System Administration in Linux

- 1) Create a new user account and home directory called "Duck"

```
user@user-VirtualBox:~$ sudo adduser duck
Adding user `duck' ...
Adding new group `duck' (1002) ...
Adding new user `duck' (1002) with group `duck' ...
Creating home directory `/home/duck' ...
Copying files from `/etc/skel' ...
New password:
BAD PASSWORD: The password contains the user name in some form
Retype new password:
passwd: password updated successfully
Changing the user information for duck
Enter the new value, or press ENTER for the default
    Full Name []: DUCK
    Room Number []:
    Work Phone []:
    Home Phone []:
    Other []:
Is the information correct? [Y/n] Y
```

- 2) Set the user account "Duck's" expiry date as 07 - 01 - 2015

```
user@user-VirtualBox:~$ sudo usermod -e 2024-01-07 duck
```

- 3) find the id of the user account "Duck"

```
duck@user-VirtualBox:/home/user$ id -u
1002
duck@user-VirtualBox:/home/user$
```

- 4) Type df and du commands and see the output on your terminal.

```
duck@user-VirtualBox:~$ touch abc.txt
duck@user-VirtualBox:~$ touch def.txt
duck@user-VirtualBox:~$ du -s *.txt
0      abc.txt
0      def.txt
duck@user-VirtualBox:~$ du -ch *.txt
0      abc.txt
0      def.txt
0      total
```

```
duck@user-VirtualBox:~$ df -h
Filesystem      Size  Used Avail Use% Mounted on
tmpfs           196M  1.7M  195M   1% /run
/dev/sda3       24G   17G   6.4G  73% /
tmpfs           980M    0   980M   0% /dev/shm
tmpfs           5.0M  4.0K   5.0M   1% /run/lock
/dev/sda2       512M  6.1M  506M   2% /boot/efi
tmpfs           196M  140K  196M   1% /run/user/1000
```

- 5) Type this command on the terminal and see the output :
du -ch *.txt

```
duck@user-VirtualBox:~$ du -ch *.txt
0      abc.txt
0      def.txt
0      total
```

- 6) Delete the user account "Duck" permanently along with its home folder.

```
duck@user-VirtualBox:~$ logout
user@user-VirtualBox:~$ sudo userdel -r duck
userdel: duck mail spool (/var/mail/duck) not found
user@user-VirtualBox:~$ ls /home/
user
user@user-VirtualBox:~$
```

Simple Filters's Assignment

Assignment For Topic	Questions
Head	
Assignment i	Try what is shown on the video
Assignment ii	1. Try to get the first 10 lines from /etc/passwd 2. try to get just the first 3 lines from /etc/passwd
Tail	
Assignment i	Try what is shown on the video
Assignment ii	1. Try to get the Last 10 lines from /etc/passwd 2. Try to get just the Last 3 lines from /etc/passwd 3. Try to follow the log file /var/log/auth.log
Sort	
Assignment i	Try what is shown on the video
Assignment ii	1. Try to sort the file /etc/passwd in assending order. 2. Try to sort the file /etc/passwd in decending order. 3. Try to sort the file /etc/passwd in assending order based on the 3 rd column. 4. Try to sort the file /etc/passwd in assending order based on the 3 rd column and ask sort to look at the thrid column as a whole number.
Cut	
Assignment i	Try what is shown on the video
Assignment ii	1. Try to cut just the usernames from the file /etc/passwd
Paste	
Assignment i	Try what is shown on the video
Assignment ii	1. Create a file alphabets.txt and key in all the 26 alphabets each one in a new line. 2. Create a file number.txt and key in 1 to 26 each one in a new line. 3. Try to paste those two files, to see which letter appears at what number. <i>Paste alphabets.txt numbers.txt</i>

```
